SUMMARY

Final-year Computer Science and Engineering student (2026) with strong foundations in Data Structures, Algorithms, and Object-Oriented Programming. Experienced in backend development using Java, Spring Boot, REST APIs, and MySQL through internships and academic projects. Skilled in building scalable and efficient backend systems and collaborating in team environments. Seeking a Java Backend Developer role to contribute to real-world software solutions.

TECHNICAL SKILLS AND CERTIFICATIONS

- **Programming Languages:** Java
- **Frontend Development:** HTML, CSS, JavaScript, React.js (Fundamentals)
- **Database:** MySQL
- **Backend Development:** Spring Boot, REST API Development
- **Version Control:** Git, GitHub
- **Tools & IDEs:** VS Code, Postman
- **Software Engineering Basics:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Core Programming Concepts, Software Development Life Cycle (Basic understanding)
- **Certifications:** CodeSignal – Revisiting Java, Revisiting OOP Concepts

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering 2022 – 2026
University College of Engineering, Nagercoil (UCEN)
CGPA: 8.34

EXPERIENCE

Full Stack Web Intern — M-Squared Software & Services Pvt. Ltd., Trivandrum June 2025 – July 2025

- Developed and enhanced backend features using Java, Spring Boot, and REST APIs
- Participated in debugging, testing, and improving application performance
- Collaborated with team members to understand requirements and implement solutions
- Gained hands-on exposure to real-world software development practices

Full Stack Development Intern — SMARK Solutions Jan 2026 – Apr 2026

- Developed full stack web applications using Java, Spring Boot, and React.js
- Built and integrated multiple RESTful APIs using Spring Boot for scalable backend services
- Designed responsive user interfaces using React.js, HTML, CSS, and JavaScript
- Worked with MySQL database for data storage and management using JPA/Hibernate
- Participated in the complete software development lifecycle (SDLC) including development, testing, and debugging
- Used Git/GitHub for version control and collaboration in a team environment

PROJECTS

PlacementTrack – Full Stack Placement Preparation Platform github.com/PlacementTrack

- Developed a full-stack web application to help engineering students prepare for campus placements with personalized guidance.
- Implemented JWT authentication with BCrypt encryption for secure user registration and login.
- Built Aptitude and Programming practice modules with topic-wise MCQs and performance tracking.
- Designed a Smart Dashboard showing progress percentage, weak areas, and personalized study suggestions.

- Developed timed Mock Tests with auto-scoring and built RESTful APIs using Spring Boot and MySQL (JPA/Hibernate) for efficient data management.
- Technologies: React.js, Spring Boot, MySQL, JWT, REST API

Limeroad Clone – Frontend E-Commerce Web Application

github.com/Limeroad

- Developed a responsive e-commerce website UI inspired by Limeroad using HTML, CSS, and JavaScript.
- Implemented product listing, user interface components, and interactive features using JavaScript.
- Designed responsive layouts and user-friendly navigation for better user experience.
- Applied clean UI design and modular frontend structure during development.
- Technologies: HTML, CSS, JavaScript, Git

Finance Management System – Backend API

github.com/finance-dashboard

- Developed a backend application to manage and track financial data and transactions
- Designed and implemented RESTful APIs using Java and Spring Boot
- Integrated MySQL database for efficient storage and retrieval of financial records
- Implemented CRUD operations and optimized data handling
- Tested APIs using Postman to ensure accuracy and reliability
- Used Git and GitHub for version control and project management
- Technologies: Java, Spring Boot, MySQL, REST API, Git

Personal Portfolio Website

github.com/My-Portfolio

- Designed and implemented a responsive portfolio website to showcase projects, technical skills, and experience. Focused on usability, clean UI design, and accessibility principles.
- Technologies: HTML, CSS, Git

Retail Shelf Inventory Management System (Hackathon Project)

github.com/Hackathon

- Built automation solution to monitor retail shelves and detect low-stock items.
- Applied Python & OpenCV for backend data analysis and image processing.
- Demonstrated automation potential in hackathon presentation.
- **Technologies:** Python, OpenCV

SOFT SKILLS

- Communication
- Adaptability
- Team Collaboration
- Problem Solving
- Analytical Thinking
